WORK EXPERIENCE

FULL-STACK DEVELOPER
Chibeco Oil and Gas Nigeria Limited
Port Harcourt, Rivers State (2022 – Present)
- Designed, developed, and maintained company websites using HTML, CSS, JavaScript, React.js, and Node.js.
- Created custom WordPress themes and plugins using PHP.
- Worked with databases and APIs to integrate third-party services into web applications.
- Developing, testing, and debugging web applications and pages in accordance with project specifications and requirements.
- Assisting in the development of user interface (UI) designs, web layouts, and other visual elements of websites.
- Assisting in the optimization of website performance, including page load times, responsiveness, and overall user experience.

WEB DEVELOPER
Core ICT Firm, Asaba, Delta State
2018 – 2019
- Collaborating with senior developers to design, code, and maintain websites using HTML, CSS, JavaScript, and other programming languages.
- Implementing web accessibility standards and best practices to ensure that websites are accessible to all users, including those with disabilities.
- Collaborating with other teams, including designers, content writers, and project managers, to ensure that website projects are completed on time and to the highest possible standard.
- Participating in code reviews and testing to identify and fix bugs, issues, and vulnerabilities in web applications and pages.

PROJECTS
- **Hospital Management System:** Designed and developed a system for managing patients' medical records, billing, and appointment scheduling using PHP and MySQL.
- **Logistics Tracking System:** Created a tracking system for monitoring the movement of goods across multiple locations using Node.js and React.js.
- **E-commerce Website:** Developed an e-commerce website that allows customers to browse, select, and purchase products online using HTML, CSS, JavaScript, and PHP.
- **School Management System**: Developed a system for automating administrative tasks within a school, such as student registration, attendance tracking, grade management, and communication with parents using PHP and MySQL.
- **E-voting System:** Created an electronic voting system that allows voters to cast their votes securely and efficiently using Python, Django, and PostgreSQL.
- **Live Chat System:** Developed a real-time chat system that enables users to communicate with each other instantly using Socket.io and Node.js.
